About Me

Software Engineering undergraduate specialized in **MERN stack** web development, with strong expertise in **React-based frontend engineering**. Seeking a Junior Web Developer or internship role where I can contribute to building scalable, user-centric real-world problem solutions while continuously strengthening my **full-stack development** skills and exploring new technologies.

Skills

- **Programming Languages :** JavaScript (ES6+), C, C++, Java
- **Frontend :** HTML5, CSS3, React.js, React Router, Tailwind CSS, DaisyUI, Next.js (basic)
- **Backend :** Node.js, Express.js, REST APIs
- **Databases :** MongoDB, MySQL, Oracle SQL (PL/SQL – basic)
- **Tools & Platforms :** Git, GitHub, Firebase (Auth & Hosting), Vercel (Backend Deployment), Axios, ESLint, Vite
- **Interpersonal Skills :** Team collaboration in university projects, Time management & adaptability

Projects

Blood Bridge – Blood donation web app   **Client Repository | Server Repository | Live Website**

Connects donors and seekers with real-time requests and admin analytics.

- Built admin **analytics dashboard** with charts and system statistics
- Implemented r**ole-based system** for seekers, donors, and admins with secure JWT authentication
- Enabled real-time **donor search** & **blood request workflow**

Bill Wise – Utility bill management system   **Client Repository | Server Repository | Live Website**

Manages utility bills with dashboards, CRUD operations, and PDF reports.

- Developed secure utility bill **CRUD** system for electricity, gas, water, and internet
- Built admin & user dashboards with analytics and **category-based filtering**
- Implemented **PDF bill report** generation using jsPDF & AutoTable

PawCare – Pet care service platform   **Repository | Live Website**

Platform for booking pet services with authentication and responsive UI.

- Built SPA with **protected routes** and Firebase authentication
- Implemented **service booking system** and user profile management
- Designed responsive UI with animations and interactive components

Education

BSc. in Software Engineering
ISLAMIC UNIVERSITY OF TECHNOLOGY
2023 - 2027 (Expected)

Certification

- Complete Web Development Course – Programming Hero

Language Proficiency

- Bangla – Native
- English – Fluent
